## **Official quote – valid until 31<sup>st</sup> Jan 2011**

### ***Komodias' Interceptor***

Komodias' Interceptor allows you to sniff normal and encrypted SSL traffic with a few simple clicks and a copy paste of our callback code into your application

Product's web page:

<http://www.komodias.com/index.php?page=interceptor.html>

Product includes:

- Winsock LSP component.
- Advanced LSP installer.  
(<http://www.komodias.com/index.php?page=rlsp.html>)
- Interceptor software.

The product has two flavors, a basic version that only intercepts traffic but does not decode the SSL traffic, the second version includes decryption modules for Internet Explorer (IE) and Firefox (FF) which decrypts the SSL data.

### ***IE interceptor stand-alone version (for normal and SSL traffic)***

This product is for users who only need to intercept IE traffic.

Product includes:

- BHO component.
- Internet explorer SSL decryptor.
- Interceptor SDK.

### ***FF interceptor stand-alone version (for normal and SSL traffic)***

This product is for users who only need to intercept FF traffic.

Product includes:

- Firefox component.
- Firefox SSL decryptor.
- Interceptor SDK.

### ***HTTP Decoder (optional module)***

This module decodes HTTP traffic, it allows the user to receive complete HTTP requests, HTTP replies and parsed HTTP body. The module decodes GZIP encoding (common inside SSL) and chunked transfer.

### ***Difference between binary and source version***

There's no difference in terms of functionality, clients who opt for the source code usually do so to either inspect the code, or to have it in their archives.

## ***Price quote***

Binary version comes with 30 days of support.

Source version comes with 60 days of support.

Binary or source code versions are royalty free and they are licensed for one named company. (For the first 50,000 deployments, we estimate that 95% of our clients are well within this limit. However if you plan to have more deployments then contact us for a special quote)

	Binary version	Source version
Without SSL modules	900\$	1450\$*
With one SSL module (IE or FF)	1100\$	2300\$**
With IE and FF SSL modules	1400\$	2900\$
Stand alone versions		
Internet Explorer SSL decryption BHO	700\$	1500\$
Mozilla Firefox component SSL decryption	700\$	1500\$
Optional modules		
HTTP decoder	450\$	1000\$
UDP Reader	350\$	800\$

\* Advanced LSP installer comes in binary form, to receive source code of the Advanced LSP installer an additional 650\$ is required.

\*\* Advanced LSP installer comes in binary form, to receive source code of the Advanced LSP installer an additional 350\$ is required.
